

PRIVATE COURSE SINCE 2004

Scrum for Teams

3Back's original course. Taught since 2004. Foundational then. Still the right ground now. Fitted to this organization and how the work actually runs. Not a public class. Not a credential.

Who this is for

Leaders sending an intact team, or teams that have to share one way of working. Right when Scrum is new, or when the framework is present and the work is not. Not an individual collecting a badge.

What this course is

A whole-team foundation in Scrum, shaped to your organization. People, Product, and Practices are the ground. The examples and constraints come from your work. The course is derived from Exploring Scrum: The Fundamentals. The book is the ground, not a script.

AI is part of the operating conditions

A Scrum team now works with AI as a tool and as a team member. That is part of the team's operating conditions and state. A course that leaves it out misses the point. This line is an add-on. The book does not say it.

How 3Back approaches learning: 3back.com/papers/how-3back-approaches-learning

Course outcomes

- Shared Scrum language fitted to this organization's application
- A usable map of People, Product, and Practices for the teams in the room
- AI treated as a team member and as part of the operating state
- A foundation the team can use on Monday. Not a badge.

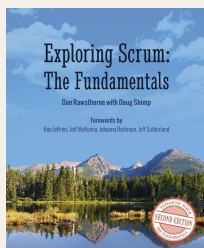

What participants receive

- Typically two days with the intact team
- On-site or private virtual
- Delivery shaped to this application
- Optional extra half-day for applied practice, mapping, and context
- Exploring Scrum as the ground, not a script
- No exam. No badge.

The ground. Not a book landing.

Exploring Scrum: The Fundamentals

Dan Rawsthorne with Doug Shimp. Second edition.

History and ground for the course. Not the product being sold.

3Back has been in this work since the founding of the Scrum Alliance. Agile community work as early as 1996.

LOOSE MAP

What the course covers

Three headings. Not fifteen credential modules. Stems are shaped to the teams in the room. Official learning objectives: 3back.com/courses/scrum-for-teams/learning-objectives

PEOPLE

- The Scrum Team
- Product Owner and ScrumMaster
- People outside the team
- Swarming in this application
- AI as a team member

PRODUCT

- What product means here
- Backlog and ordering
- Stories, epics, agreement
- Technical debt
- Done when AI touches the increment

PRACTICES

- Agreement-based planning
- Daily, review, retrospective
- Adjusting the sprint
- Visible progress without theater
- Inspect AI-touched work in the same events

Your goals for this delivery

What must this course help your team do differently? Write three outcomes to bring into the conversation.

Goal 1

Goal 2

Goal 3
